

NEW UNM DENTAL AMBULATORY SURGICAL CENTER

February 20, 2013

Dear Doctor,

Thank you for taking time from your busy schedule. I would like to introduce myself and our new outpatient dental surgical facility that is now open to you and your patients. My name is Jason Flores, DDS, and I am Director of Dental Anesthesiology for the UNM Department of Dental Medicine's Ambulatory Surgical Center located at 1801 Camino De Salud, Suite 1100 in Albuquerque, NM. We are a state licensed, AAAHC accreditation pending surgical center dedicated to outpatient dental procedures. We are fully equipped with advanced dental and medical equipment, including digital x-rays, intraoral cameras, electronic charting, and full operating rooms.

Our goal is to assist your office in offering a healthy mouth to all of your patients while they sleep comfortably and safely. **The satisfaction of our patient, parent, and referring doctor s is the cornerstone of our program.** We strive to meet this goal by completing dental treatment in just one dental procedure visit.

Our friendly staff includes experienced dental and nursing professionals who care for each individual patient as though they are family. We work hard to make certain every family and referring doctor's office has a positive and pleasant experience with us.

Scheduling a visit with us is simple. Just contact our office at 505.925.4031 and our staff will schedule your patients. We will also answer any questions you or your patients may have at that time. You can refer patients by phone: 505.925.4031, email UNMDentalASC@unmmg.org or visit us online at <http://unmmg.org/clinics/dental/asc>.

We make every effort to offer outstanding and safe dental care to as many people in our community as possible. Please feel free to contact us for more information, or to tour our facility. Please feel free to post the attached information flyer about the new UNM Dental Ambulatory Surgical Center.

Sincerely,

Jason R. Flores, RN, DDS, DADBA, DNDBA, FADSA
Board Certified Dentist Anesthesiologist
Director of Dental Anesthesiology, Assistant Professor
